Pakistan Journal of Nuclear Medicine is the official journal of Pakistan Society of Nuclear Medicine

From the Desk of Editor

Dear Readers,

... me to us (.)

I am pleased to announce the release of the current issue of the Pakistan Journal of Nuclear Medicine (PJNM), Volume 13, Issue 1. It is imperative to share some important updates regarding the editorial board of our journal. In our ongoing efforts to enhance the dynamism and efficiency of the team, we are implementing a series of strategic changes. We are in the process of refining the list of editorial board members, making it more discerning and responsive.

To align with our vision for inclusivity and to provide opportunities for fresh perspectives, we have decided to make room for emerging talents. Consequently, some members from the current list will be stepping down, creating space for the infusion of new and innovative ideas from young, dynamic individuals.

In addition, we recognize the importance of a well-rounded and proactive team. Therefore, we are actively seeking an associate editor to join our ranks. This addition is aimed at fortifying our editorial team, ensuring increased vigilance, and fostering a more efficient workflow.

These changes reflect our commitment to maintaining the standards and staying attuned to the evolving landscape of our field. We appreciate your continued support and look forward to the positive impact these enhancements will bring to our journal.

Looking ahead, our aspirations for PJNM are expansive. In the coming year, we aim to elevate our impact by publishing two issues, a goal that requires collaborative efforts from the entire nuclear medicine community and its allies. We extend an open invitation to nuclear physicians, medical physicists, biochemists, and scientists associated with nuclear medicine to join us in this endeavor.

To realize our dream, we must work diligently and foster close collaboration. By uniting our strengths and expertise, we not only pave the way for the publication of two issues next year but also meet the necessary requirements for indexation. This marks a significant step forward in establishing PJNM as a recognized and valued resource in the field.

At PJNM, we are committed to enhancing the journal's visibility and impact. Our team is actively preparing the essential documentation to ensure a swift submission process when the journal meets the criteria for indexing. We encourage the support and active participation of the entire nuclear medicine community to contribute to the success and growth of PJNM.

There is one more initiative to share that is aimed at increasing our readership and broadening the scope of our journal's coverage. We broaden scope of our journal and add diagnostic imaging in addition to nuclear medicine. We believe that diversifying our content will not only appeal to a larger audience but will also contribute to the advancement of knowledge in nuclear medicine. Your thoughts and feedback are extremely valuable to us. We may modify the title of journal as well. We invite you to comment on this initiative and let us know any more topics and areas you would like to see covered. Together, we can make PJNM a dynamic platform that responds to our readers' changing needs and interests.

Thank you for your ongoing support and dedication to advancing the field of nuclear medicine and medical imaging. "me to us may get a meaning," Together, we can achieve new heights and make a lasting impact.

Regards,

Dr. M. Babar Imran  (Tamgha e Imtiaz)
